Essential Goal
Through the practice of counseling micro skills, development of intentionality in conceptualization of clients and their issues, along with increased awareness of self as an essential component in effective therapeutic interactions, students will establish a foundation for their professional role as effective counselors.

Format and Outcomes
Students will demonstrate the understanding and use of counseling skills as well as basic counseling theories, which includes their relationship to social and cultural
contexts. Ethical principles, self-awareness, personal counseling style and honoring of diversity will be examined through textbook reading, class discussions, reflective assignments, as well as various classroom activities.

A required personal worldview paper will command and demonstrate a student’s self-awareness of their cultural heritage along with their personal philosophies of life. This self knowledge will be a point of awareness when learning and demonstrating counseling skills as well as when students engage in ongoing class discussions related to diversity and cultural awareness of others.

Students throughout the class will be practicing counseling skills and will provide three videotapes demonstrating their understanding and acquisition of counseling skills.

The class will be developed as a community of collaborative learners where each will be an active in agent in their own learning experiences. Students will participate in generating a classroom environment where students support each other in a respectful, productive and resourceful manner as might be paralleled in the world of work.

**Evaluation**

Each student will be evaluated in the areas of demonstration of microskills, self-awareness, theoretical knowledge, integration and application, ethical considerations, effectiveness of oral and written communication, and openness to feedback. Judgments about what constitutes satisfactory performance will be made by the class instructor which if not satisfactory might result in failure of the class. Final decisions will be made by the class instructor about successful completion of the class as well as readiness to move forward to practicum.

**Confidentiality and Ethical Guidelines**

It is expected that students will follow the ethical guidelines as defined by the American Counselors Associations. The class activities and assignments require utilizing classmates for “counseling interviews” for the purpose of demonstrating microskills. Although guidelines, parameters and boundaries are implemented into the topics utilized for the tapings it is expected that anything presented by students during tapings and in class discussions will remain absolutely confidential. Failure to follow these guidelines may result in failure of the class.
