COURSE DESCRIPTION

This internship provides experience in applying family therapy theory to clinical practice in our departmental clinical training facility, the L&C Community Counseling Center, while concurrently completing an externship in a community agency. Through live supervision and team consultation, students will have the opportunity to apply a variety of systemic ideas and practices reflective in social justice based Marriage and Family Therapy approaches. Throughout your clinical practice, you will participate in group and individual supervision. You may be asked to meet with your supervisor alone or with one other MFT trainee in the program. Individual supervision is defined as no more than two supervisees meeting with a supervisor face to face. Depending on your location, you will also meet as a group with up to 10 other MFT students who are working at various sites. This group supervision will be led by an AAMFT Approved Supervisor or the equivalent.

The majority of supervision (at least 50%) must be based on raw data (i.e., live observation/video-tapes of sessions with clients or co-therapy with your supervisor). These arrangements must be maintained during academic breaks when you are not actually enrolled in the course but are seeing clients through your affiliation with Lewis and Clark College. This syllabus serves as a contract between you, the program, and your individual faculty supervisor. Before you graduate, you must complete 500 hours of direct client contact (250 relational) and 100 hours of supervision as detailed in the MCFT Clinical Training Handbook.

COURSE PURPOSE

Throughout your clinical experience and supervision, you will be working on numerous areas of your clinical work. This includes, but is not limited to, the AAMFT Core Competency subsidiary domains, which are focused on the types of skills or knowledge that MFTs must develop. These are: a) Conceptual, b) Perceptual, c) Executive, d) Evaluative, and e) Professional. Areas that will be included in your evaluation at the end of the semester include:

- **Therapeutic Relationship**, *e.g., conveying respect to client; attending to the therapeutic relationship; using self of the therapist*
- **Conceptual Abilities**, *e.g., adopting a systemic view; attending to multiple systems; basing goals, hypotheses and interventions on theory*
- **Contextual Awareness, Knowledge and Skill**, *e.g., acknowledging family development; attending to culture and context in therapy; incorporating awareness of gender, race, ethnicity, abilities, language, sexual orientation, etc.; integrating analysis of power and social justice/advocacy*
- **Perceptual Competencies**, *e.g., identifying and intervening in patterns of interaction; distinguishing process from content; identifying self as part of the system*
- **Structuring Therapy**, *e.g., organizing session; communicating clearly, precisely and effectively; establishing and reviewing goals*

- **Intervention and Evaluative Skills**, e.g., *linking interventions to theory; recognizing impact of interventions on wider system; intervening intentionally and consistently throughout the therapeutic relationship; following up on interventions; formulating and altering treatment plan as needed*
- **Executive/Case Management**, e.g., *maintaining complete, relevant case notes in a timely manner; completing all required paperwork, letters, contacts, etc. in a professional and timely manner; contacting referral sources/other professionals involved in a timely manner and sharing relevant information; completing effective assessments and appropriately using the DSM V*
- **Professional Development**, e.g., *being prepared for supervision /seeking and incorporating feedback from supervisor; being aware of own professional development and self as a therapist; maintaining a professional image, professional boundaries, and positive relationships with colleagues*
- **Other Specific Goals**, (1) *Articulate basic principles of justice and equity in family therapy; (2) Provide an introduction and develop an understanding of tools and techniques utilized in the Transformative Family Therapy Model; (3) Learn concepts useful for understanding and delivering social-justice based interventions; (4) Increase critical consciousness around issues of race, class, gender, sexual orientation, community and domestic violence.*

Please review the supervisor evaluation instrument. This can help guide you further in understanding the specific areas of development that are expected in the program and field.
