The Ever Evolving Syllabus of MHC 541
Introduction to Assessment
Fall 2015

Instructor: Jeffrey Christensen, PhD
Phone: 503-768-6071
e-mail: jchristensen@lclark.edu
Office Hours: Please arrange in advance by email

Catalog Description:
Principles of psychological assessment as employed in school, clinical, and applied settings. Addresses psychometric concepts such as validity, reliability, norms, and score interpretation. Surveys intelligence, personality, career, interest, aptitude, and achievement tests and reviews alternative methods of assessing competence and person-situation interactions. Contemporary issues such as the validity of instruments for diverse populations and the impact of technology on assessment are discussed.

Required Text:

Course Expectations:

CPSY Departmental Attendance Policy

Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time may result in failure to complete the class. This would be 4.5 hours of a 45 hour class (3 credits), 3.0 hours for a 30 hour class (2 credits) or 1.5 hours for a 15 hour class (1 credit.) In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness may be seen as an absence that requires make-up work.

Participation in class activities and discussion within the course are paramount, therefore regular and timely attendance is expected. Students are expected to attend all classes on time unless an illness or emergency occurs. All other absences should be discussed with the instructor in advance. More than one absence from class may result in a failing or incomplete grade. If a student plans to leave class early, he or she needs to alert the instructor in advance and complete required work. Missed classes will require a make–up assignment: a one page bulleted summary of the information presented in the class you missed, gathered via interview with your classmates, and an article review on a topic related to the missed class with a two page written review and reflection.

PLEASE NOTE (Americans with Disabilities Act): Students with specific learning needs
and/or disabilities who may need accommodations, who have any medical emergency
information the instructor should know of, or who need special arrangements in the event
of an evacuation, should inform the instructor as soon as possible, no later than the first
week of term.

**Course Requirements:**

1. Attend and participate in class. Attendance is mandatory. (See Course Expectations)

2. Complete weekly readings prior to class meetings

3. Mid-Term exam (25% of grade)

4. Final exam (25% of grade)

5. Test Review (25% of grade)

A written review of one assessment of your choice written in APA format. You can
obtain the test from the counseling psychology office (there are several tests on
reserve), or from some other source such. The review in the Mental
Measurements Yearbook (a reference book in the library--Buros, ed. or on-line), can
be very helpful, but should not be used solely. The reviews in the text should be
helpful.

I. Identifying information (type of test, population group, type of
information yielded, how it is administered and scored, publisher)

II. What and for whom is this test intended?

III. Summarize evidence regarding reliability and validity and evaluate each.

IV. If there is a manual how well does it portray the uses and limits of this
test given the evidence in III? If there is no manual, how readily available
was this information presented by the author of the test, or other authors’
review of the test?

V. How helpful is the manual to you as a test user?

VI. How are issues related to minorities and special populations handled?

VII. Your evaluation:

On the basis of the information presented, for what purposes and with
which clients would you consider this test to be useful? For what purposes
and with what clients would you **not** consider it useful?

What **other** kinds of information would you want to combine with test
results to help you or your client make decisions resulting from an
assessment?

What issues must you attend to carefully in order to present the test
results accurately, i.e., not over- or under-interpret their significance?
This review should be no more than 10 double-spaced typed pages.

**Due: 10/27/15**

6. In-class group project (25% of grade)

Conduct an evaluation of a fictitious human character that addresses the following:

- Assessment questions (what questions come up given the character’s presentation?)
- Assessment strategies (given the specific personality traits of this character, what strategies are needed to ensure valid and reliable results?)
- Assessment devices (you are encouraged to respond to psychological tests as if you were the character)
- Your interpretation of the results
- How you will present the results to your character

There will be four groups of ___ students each, and you will present your findings to the class towards the end of the semester (30-40 minute presentation). Assume that you have three hours with your character, so do not go overboard with testing. You are encouraged to be creative and fun with this activity, but approach the conclusions with seriousness, using the data you have. For your presentation, you may choose to role-play the administering and/or presentation of the results to your character. If you have trouble agreeing on a character, I can provide you with one.
