

COURSE SYLLABUS COVER SHEET
Lewis & Clark College
Graduate School of Education and Counseling

Course Name	CPSY 538 – Section 1
Course Number	Advanced Research Methods
Term	Fall 2015
Department	Counseling Psychology
Textbooks/Materials	See attached
Faculty Name	Carol Doyle
Faculty Phone/E-mail	cdoyle@lclark.edu
Faculty Office	Rogers Hall 317

Course Description

Advanced Research Methods has been developed for those students who enter their Counseling Psychology program with a strong background (2 research methods/statistics courses and/or research assistantship as part of undergraduate degree.) This class will build on student's base of knowledge by providing an opportunity to learn about aspects of the research process in more detail. We will also learn about new and innovative designs and/or methods. Students will design a research project (hypothetical) utilizing a design or method that they have not studied and/or used before. Students planning to complete a thesis will refine their thesis topics, develop a research question, and begin their thesis proposal, including a literature review.

The structure of the class will include some lecture but primarily that of a research colloquium. Each meeting of the colloquium will cover a different broad topic with specifics determined by the class. Class will also provide the opportunity to present "problems" and/or issues that have come up as you design your projects.

Course Goals and Objectives:

The primary goal of this class is to further develop students' understanding of the research process specifically related to research related to their professions. Included will be an understanding of program evaluation, evidence based practice, and the use of research findings for program/practice improvement. An additional goal is to have students critically analyze published research and/or be able to conduct independent research.

The objectives of this class will be to provide opportunities to learn and apply the skills necessary for evaluating research, including analyzing published instruments, and conducting independent research, including needs assessments and program evaluation. Emphasis will be on the following components of the research process: research questions and hypotheses, research design including qualitative research, action research and program evaluation, operationalization of variables, and measurement issues. The impact of culture on research design and analysis will additionally be addressed.

By the end of the semester students will be able to:

- Identify various paradigms for conducting research
- Understand the process of developing a research project
- Write research questions and hypotheses
- Understand the ethical issues involved in working with human participants
- Identify and describe various types of quantitative research designs
- Identify and describe various types of qualitative research designs

- Identify the components and models of program evaluations, including needs assessments
- Identify and describe validity issues inherent in different types of designs
- Discuss the use of research findings for program change and practice improvement
- Discuss the issues involved in conducting real world research
- Discuss the impact of culture on various aspects of the research process
- Critically evaluate published research articles
- Write an Introduction and Literature Review for a research project (thesis students only)
- Design a proposal for research project

Additionally, the course will cover the objectives and competencies from your professional organizations. These include:

From the CACREP 2016 Standards

Professional Counseling Identity (CACREP 2016 Standards)

7g. statistical concepts, including scales of measurement, measures of central tendency, indices of variability, shapes and types of distributions, and correlations.

8a. the importance of research in advancing the counseling profession, including how to critique research to inform counseling practice.

8b. identification of evidence-based counseling practices

8c. needs assessments

8d. development of outcome measures for counseling programs

8e. evaluation of counseling interventions and programs

8f. qualitative, quantitative and mixed research methods

8g. designs used in research and program evaluation

8h. statistical methods used in conducting research and program evaluation

8i. analysis and use of data in counseling

8j. ethical and culturally relevant strategies for conducting, interpreting, and reporting the results of research and/or program evaluation

From the Marriage & Family Therapy Core Competencies & MCFT program standards

Students:

- Understand research and program evaluation methodologies, both quantitative and qualitative, relevant to MFT and mental health services.
- Demonstrate an understanding of process and outcome, research design, methodology, basic statistics, with research knowledge in individual and family counseling
- Understand the legal, ethical, and contextual issues involved in the conduct of clinical research and program evaluation.
- Recognize informal research processes involved in therapy, own biases relative to research
- Know the extant MFT literature, research, and evidence-based practice.
- Read current MFT and other professional literature and use the literature to inform clinical practice.
- Critique professional research and assess the quality of research studies and program evaluation in the literature.

- Determine the effectiveness of clinical practice and techniques.
- Utilize research and technology applications in marital, couple, and family counseling
- Recognize opportunities for therapists and clients to participate in clinical research when appropriate

Course Calendar: See attached

Course Requirements: See attached

The graded requirements of the course differ dependent on whether or a student working toward admission to the M.S. and planning to complete a thesis or you are a student with a strong research background that is not planning to complete a thesis. Overall, the requirements of the course include, out of class assignments, the development of a research article critique guide, a reading journal, class presentations, and summaries and critiques of a research articles, and a group research project (for non-thesis students) and an introduction to a research proposal/literature review.

Attendance requirements: Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time may result in failure to complete the class. This would be 4.5 hours of a 45 hour class (3 credits), 3.0 hours for a 30 hour class (2 credits) or 1.5 hours for a 15 hour class (1 credit.) In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness may be seen as an absence that requires make-up work.

Late papers and assignments: Any assignments turned in late (without previous permission) will automatically receive a 10% reduction in grade.

Evaluation and Assessment:

Each assignment will be graded via a point system. Generally speaking, the following grades can be associated with the points for each assignment and for the final grade

93% of points possible	-	A
90 – 92% points possible	-	A-
88 – 89% or points possible	-	B+
83 - 87% of points possible	-	B
80 – 82% points possible	-	B-
78 – 79% or points possible	-	C+
73 - 77% of points possible	-	C
Less than 73%		D/F

Additionally, please note that if the basic requirements for an assignment are met, the points given will be associated with a B+. If one exceeds the requirements of the assignment there point total will improve accordingly, Similarly, if the assignment does not meet the requirements point total will decrease accordingly. The points associated with each assignment are attached.

Late papers and assignments: Any assignments turned in late (without previous permission) will automatically receive a 10% reduction in grade.

Key Required Assignments/Student Learning Outcomes

These assignments are required for the course, but **will not be the only requirements/expectations**. The chart below lists the assignment, method of submission, and benchmark score/grade. These assignments are set up for upload to Taskstream and/or instructor provides rating for assignment. See syllabus for details.

	Proficient (A)	Benchmark (B)	Emerging (C)	Inadequate/Fail	As evidenced by:	Program Objective
Goal						
Students summarize and critique research relevant to counseling, addictions, and/or clinical mental health		Met expectations		Did not meet expectations	MHC 535: Group Article Summaries	9. Research and Assessment (2 of 7)
	Proficient (A)	Benchmark (B)	Emerging (C)	Inadequate/Fail	As evidenced by:	Program Objective
Goal						
Students summarize and critique research relevant to counseling, addictions, and/or clinical mental health	93-100% Assignment scores	83% -92% Assignment scores	80-82%	Below 80% Assignment scores	MHC 535: Qualitative Article Critique	9. Research and Assessment (2 of 7)
	Proficient (A)	Benchmark (B)	Emerging (C)	Inadequate/Fail	As evidenced by:	Program Objective
Goal						
Students summarize and critique research relevant to counseling, addictions, and/or clinical mental health	93-100% Assignment scores	83% -92% Assignment scores	80-82%	Below 80% Assignment scores	MHC 535: Quantitative Article Critique	9. Research and Assessment (2 of 7)

	Proficient (A)	Benchmark (B)	Emerging (C)	Inadequate/Fail	As evidenced by:	Program Objective
Goal						
Students understand models and methods of program evaluation	93-100% Assignment scores	83% -92% Assignment scores	80-82%	Below 80% Assignment scores	MHC 535: Program Evaluation Article Summary/Review	9. Research and Assessment (3 of 7)

	Proficient (A)	Benchmark (B)	Emerging (C)	Inadequate/Fail	As evidenced by:	Program Objective
Goal						
Demonstrates an understanding of various types and designs of research relevant to counseling.	93-100% Assignment scores	83% -92% Assignment scores	80-82%	Below 80% Assignment scores	CPSY 538 Research Compilations	9. Research and Assessment (4 of 7)

Accommodations for Students with Special Needs and/or Disabilities:

If you have a disability that may impact your academic performance, you may request accommodations by submitting documentation to the Student Support Services Office in the Albany Quadrangle (x7156). After you have submitted documentation and filled out paperwork there for the current semester requesting accommodations, staff in that office will notify me of the accommodations for which you are eligible. Please notify me of any special learning considerations that I should be aware of so that we can work together to make the appropriate accommodations.

Authorization Levels: All levels

*“Research is always carried out by an individual with a life and a lifeworld ..., a personality, a social context, and various personal and practical challenges and conflicts, all of which affect the research, from the choice of a research question or topic, through the method used, to the reporting of the project’s outcome. Most research textbooks do not bring the living reality of you, the researcher, into the discussion of research. We believe that the person is always at the center of the process in inquiry – that you will always be at the center of your own research, which in turn will always be a part of you” (Bentz, V. M. & Shapiro, J. J. (1998).
(Mindful Inquiry in Social Research, p 4.)*

Course Description

Advanced Research Methods has been developed for those students who enter their Counseling Psychology program with a strong background (2 research methods/statistics courses and/or research assistantship as part of undergraduate degree.) This class will build on student’s base of knowledge by providing an opportunity to learn about aspects of the research process in more detail. We will also learn about new and innovative designs and/or methods. Students will design a research project (hypothetical) utilizing a design or method that they have not studied and/or used before. Students planning to complete a thesis will refine their thesis topics and begin developing a research question.

The structure of the class will be that of a research colloquium. Class will also provide the opportunity to present “problems” and/or issues that have come up as you design your projects.

Requirements:

The graded requirements of the course differ dependent on whether or a student working toward admission to the M.S. and planning to complete a thesis or you are a student with a strong research background that is not planning to complete a thesis. Overall, the requirements of the course include, out of class assignments, the development of a research article critique guide, a reading journal, class presentations, and summaries and critiques of a research articles, and a group research project (for non-thesis students)

The major requirement for thesis students will be to determine your topic/question and write a literature review that provides the research basis of your thesis.

Assignments and Points

Class Participation	85
Beginning to Research Assignment	30
Reading Journal	50
Class Presentations	40
Article Summaries/Critiques (3)	135
Critique Questions	25
Introduction/Justification	25
Research Design Compilation	50
Literature Review	100
Thesis Presentation	10

Final grades will be based on a 550 point total and will be distributed as follows:

511 and above	A
495 – 510	A-
484 - 494	B+
456 – 483	B
440 – 455	B –
429 – 439	C+
below 429	Fail

Late papers and assignments: Any assignments turned in late (without previous permission) will automatically receive a 10% reduction in grade.

Tentative Course Schedule

<u>Date</u>	<u>General Topic</u>	<u>Readings for Class</u>	<u>Assign/Hmwk DUE</u>	
Sept 7	Intro Overview of Class Becoming a Researcher			5 pts
Sept 14	Transformative Paradigm in Detail	Mertens 1 – 3	Assignment one Due date moved to Sept 21	
Sept 21	Developing the Focus of Research/Evaluation Studies Developing and Refining a Research Problem Reviewing the Literature Recognizing Good research Critically Reviewing the Literature Thinking About Critiquing	Mertens Chap 4 Additional Readings	Citations and Light Survey	30 pts
Sept 28	Transformative model Program Evaluation Models and Examples	Mertens TRE Chap 5 Additional Readings	Bring article to class	
Oct 5	Transformative Lens as Foundation for Research Mixed Methods as Backdrop for Transformative Selection of Participants Ethics Data collection Data Analysis	Mertens Ch 6 pp. 164-169 Ch 7 Ch 8 – 233 – 241 Ch 9 – 281 – 292; 309-312	Program Evaluation Summary/Critique	40 points

Oct 12	Evidence Based Practice Outcome research Quant #1 Types of Quant Participant Selection in Quant	6 pp. 185 - 194	Bring article(s) to class	
Oct 19	Methods of Quantitative Defining Independent Variables	268-280	In class discussion	
Oct 26	Operationalizing Variables Operationalizing Variables Reliability/Validity Quantitative Analysis - Descriptive Statistics		Quantitative Article Summary/Critique Due	40 points
Nov 2	Quant Analysis con't Inferential Stats Hypothesis Testing	Ch 9 299 - 309		
Nov 9	Qualitative Overview Types of qualitative Qualitative Participant Selection	Ch 6 pp. 169 – 185; 194-198		
Nov 16	Qualitative Methods		Qualitative Article Summary Critique due	40 pts
Nov 23	<i>Fall Break</i>	<i>No class</i>		
Nov 30	Qualitative Analysis	Ch 9 – pp 292 – 299	Intro Due Question/Justification	25 pts
Dec 7	Reporting & Utilization Critiquing Research	Mertens Ch 10	Critique Guides Research Templates Due	25 points 50 points
Dec 14	Thesis Presentations Final Discussion		Lit Reviews Due	100 pts
