

"We are a community that commits itself to diversity and sustainability as dimensions of a just society" --*Lewis and Clark Mission Statement*

**LEWIS & CLARK GRADUATE SCHOOL  
OF EDUCATION AND COUNSELING**

**MCFT 541 Systemic Assessment and Treatment Planning  
FALL 2016**

---

<b>Time &amp; Day:</b>	Mondays 1:00 - 4:00 (section 1) Thursdays 5:30 - 8:30 (section 2)
<b>Place:</b>	York Graduate Center, room 107
<b>Instructor:</b>	Lana Kim, PhD, LMFT
<b>Office Hours:</b>	Tuesdays 1:00-5:00 pm (please email to schedule an appointment)
<b>E-Mail:</b>	<a href="mailto:lkim@lclark.edu">lkim@lclark.edu</a>
<b>Phone:</b>	503-768-6073 (office)

**CATALOG DESCRIPTION**

Application of family systems theories, social equity, and evidence based practice to assessment, diagnosis, and treatment planning in marriage, couple, and family therapy. Course examines the theoretical assumptions and values underlying approaches to the treatment of major mental health issues and other presenting issues such as child behavior problems, addiction, suicide, familial violence, and families managing acute and chronic medical conditions. Specific assessment techniques and tools are discussed, evaluated, practiced, and applied to clinical diagnoses and treatment planning, including risk assessment and crisis intervention.

**Prerequisite:** CPSY 504, CPSY 522, or CPSY 538

**Credit:** 2 semester hours

**MCFT STUDENT LEARNING OUTCOMES**

- SLO 1.1 Students recognize the impact of power on individuals, families, and communities.
- SLO 1.2 Students recognize the interconnections among biological, psychological, and social systems in people's lived experience.
- SLO 1.3 Students apply system/relational theories to clinical case conceptualization.
- SLO 2.2 Students' clinical practice demonstrates attention to social justice and cultural democracy.
- SLO 3.1 Students are able to discern the implications of the sociopolitical context with which research is produced and applied.
- SLO 3.2 Students draw on the research literature relevant to family therapy in case planning.

**COURSE OBJECTIVES**

The following objectives are in keeping with the AAMFT Core Competencies. At the end of this course, students are expected to:

1. Understand models for assessment of relational functioning. (CC 2.1.6, 2.3.1)

2. Develop skills for crisis intervention and longer-term treatment planning in family therapy.
3. Assess risk for substance abuse, child and elder maltreatment, domestic violence, physical violence, suicide potential, and dangerousness to self and others and develop adequate safety plans (CC 2.3.5, 3.3.6, 3.4.3, 5.3.4; TS 2.15, 3.04)
4. Consider the theoretical assumptions and values underlying approaches to the treatment of major mental health issues and other presenting concerns, especially as they relate to social equity. (CC 2.1.6)
5. Assess bio-psycho-social-spiritual history and socioeconomic context to identify clients' strengths, resilience, and resources. (CC 2.3.6, 2.3.7; TS 2.18, 2.19)
6. Develop treatment plans that integrate DSM diagnosis into a systemic case conceptualization. (CC 2.1.4; TS 2.14)
7. Develop treatment goals based on contextual and systemic dynamics (e.g., gender, age, socioeconomic status, culture/race/ethnicity, sexual orientation, spirituality, larger systems, social context). (CC 1.21; TS 2.19)
8. Develop hypotheses regarding relationship patterns, their bearing on the presenting problem, and the influence of extra-therapeutic factors on client systems. (CC 2.2.3; TS 2.01)
9. Apply current research and evidence-based practice to systemic treatment planning.
10. Demonstrate effective and systemic assessment techniques and strategies. (CC 2.3.3; TS 1.02)
11. Link treatment planning to specific MCFT theories.
12. Communicate diagnostic information so clients understand its relationship to treatment goals and outcomes. (TS 3.05)

## CLASS ASSIGNMENTS

1. **Participation** (10 points)

This course emphasizes shared engagement with the assigned readings and clinical competencies. Toward this end:

- Regular attendance is encouraged. However, in the event of illness or other emergency, I always appreciate the professional courtesy of advance notice.
- Come to class prepared (having completed the readings for the day).
- Engage in group discussions and role plays.
- Please decide to take an active part in creating a community of engaged scholarship. The voice and involvement of each person is important. Passive participation is not sufficient for you to fully benefit from this class. Give attention to the instructor and/or other students when they are speaking or making a presentation, ask questions, share your observations and comments, and display respectful curiosity about how your colleagues are making sense of the material we are exploring.
- Please put your cell phones on silent or vibrate mode to reduce the distraction to your classmates and instructor. Also, do not view text messages during class. If you are anticipating the need to view an urgent text message or take a call, please step out of the classroom to handle your personal business. However, please talk to me before class about how to monitor your communication device. **On-going use of cell phones during class will negatively reflect in your final grade.** Also, in order to facilitate a climate of learning and to reduce the distractions for yourself and others, please refrain from engagement in social media or other personal business.

Your participation in class activities will be evaluated according to the following rubric:

CLASS PARTICIPATION COMPETENCIES	Possible points	Points demonstrated
Prompt and dependable presence in the class.	3	
Prepares for class by immersing self in course readings and reflecting on their application to practice.	3	
Engages in course activities with a spirit of openness and curiosity.	2	
Helps to create an atmosphere of safety and mutual respect among all class members.	2	
TOTAL	10	

## 2. Expanding the Lens: Societal & Relational Assessment & Case Planning (50 points) DUE October 17

A. Watch the documentary “*Meet the Patels*.” (We will view the documentary in class, but it is also available online at iTunes, Amazon video, Netflix, Youtube, or other outlets). After

viewing the documentary, imagine that Geeta has brought her mother, Champa, in to see you, stating that she is worried about her mom and noting that she has become more irritable and unhappy over the past month. Geeta reports that her mother has been having trouble sleeping, experiencing chronic, dull headaches, and has been losing interest in social activities. She casually alludes to some extenuating family conflict that has not been resolved.

B. Acknowledging that there are many ways in which one could define the presenting problem and think about the case, write a case conceptualization. Draw from class role plays, course readings, course discussions, and relevant research to develop a case conceptualization and treatment plan. Include the following:

1. A description of the presenting problem.
2. An analysis about which biological factors, contextual factors, societal discourses, and societal messages might be influencing each person and how these might inform their actions in response to one another and the presenting issue.
3. An analysis of the family's social capital and strengths vis-a-vis their social location and intersectionality.
4. An analysis of the family's dynamics and interaction patterns. Pay particular attention to the nuances of culture as it relates to each family member's sense of cultural identity, cultural ideology, social and familial network, and lived realities.
5. Systemic case conceptualization of the presenting issue that relates the above to a DSM diagnosis.
6. Develop treatment goals and a treatment plan specific to your assessment and integrated case conceptualization. Discuss your treatment framework and which therapeutic approaches you might use, also providing a rationale as to how your ideas would address larger context influences. Apply relevant research to support your work. Your integration of research should demonstrate an awareness of the sociopolitical context of both the research and the case.

Expected page length is **6-8 double-spaced pages**.

Evaluation rubric for this assignment is attached at the end of the syllabus.

### **3. Family Assessment Tool Group Presentation (30 points). (Due as scheduled)**

This assignment is designed to help familiarize students with some commonly used family assessment tools. For this assignment, students will work in groups of 5-6. Each group will be assigned a family assessment tool to research, discuss, and critique. Next, each member of the group will take the assessment and score it individually so that they become familiar with it prior to presenting it in class.

On the group's assigned date, members will give a 40-45 minute presentation on their assigned assessment discussing its history, theoretical foundations, uses and applications - along with a critique of the assessment and the extent to which it does or does not address/attend to larger social context factors and aspects of diversity and human difference. The group is responsible for providing instruction to the rest of the class on how to administer the assessment and will

demonstrate this in class with the assistance of colleagues who will pose as mock clients. Upon administering the assessment, the group will have to score it, explain the scoring process to the rest of the class, and then interpret what the scores may mean.

Each group will submit a 3-4 page, double spaced summary of the key points discussed in their presentation, which the instructor will share with the rest of the class via Moodle. Each member of the group will also submit a hardcopy of the assessment they took and scored individually.

The following rubric will be used to evaluate students' work:

FAMILY ASSESSMENT TOOL GROUP PRESENTATION COMPETENCIES	Possible points	Points demonstrated
Includes a summary of the presentation and hardcopies of each group members' completed assessment and score sheet.	5	
Demonstrates group collaboration, organization of material, and effective use of time.	5	
Demonstrates knowledge of assessment tool and clearly discusses its history, development, and uses and applications.	5	
Discusses the assessment tool in relation to the larger social context and aspects of human diversity.	5	
Demonstrates knowledge of how to administer the assessment tool and interpret the results in relation to the client's unique context.	5	
Demonstrates accurate understanding of assessment tool scoring procedure.	5	
TOTAL	30	

#### **4. Final Case Assessment & Treatment Plan. (60 points). DUE November 21.**

For this assignment, think of a presenting issue that is of interest to you and create a case vignette that illustrates the symptoms and relational and societal contexts surrounding the problem. Possible topics to build your vignette around might be: depression, anxiety, attachment problems, eating disorders, attention deficit concerns, psychotic disorders, etc. The case you construct may be one you have observed or are familiar with, one drawn from the literature, one you make up, or a combination of these. However, if you draw from a real case, remember to change all names and identifying information. Use the following as headings:

- a) Names and demographic information (discuss social location)

- b) Presenting issues or concerns. Referral source. How is the presenting concern a problem and for whom?
- c) Risk assessment
- d) Family history and social stressors
- e) Impact of sociocultural context
- f) Family interaction patterns
- g) Social capital and potentially healing interactions
- h) DSM-5 diagnoses (Discuss the issue in terms of the appropriate DSM-5 criteria and consider the systemic contexts related to the client's problem).
- i) Case conceptualization (should use family or relationship as the subject of the first sentence and explain how you are understanding the presenting issues from a systems/relational perspective). Discuss family strengths.
- j) Summary of relevant research (no more than 2 paragraphs). Conduct a review of the relevant research and assessment instruments or tools that may be relevant/helpful in case conceptualization and treatment planning. Literature review must include family therapy journals, but may also draw on other related literature. Analyze the research from a socio-contextual perspective, and provide a rationale for either how the literature informs treatment planning or critique how it might not directly apply to your particular case because of the contexts in which the various research findings were developed.
- k) Suggested treatment goals from 3 different theoretical models with corresponding treatment plans. Demonstrate links between assessment/conceptualization, treatment goals, and treatment plan. Provide a rationale for your thinking.

Write clearly, concisely, and demonstrate analytic thinking. Avoid pathologizing language. Assignment should be between 8-10 double spaced pages.

Evaluation rubric for this assignment is attached at the end of the syllabus.

## **NON-DISCRIMINATION POLICY/SPECIAL ASSISTANCE**

Lewis & Clark College adheres to a nondiscriminatory policy with respect to employment, enrollment, and program. The College does not discriminate on the basis of race, color, creed, religion, sex, national origin, age, handicap or disability, sexual orientation, or marital status and has a firm commitment to promote the letter and spirit of all equal opportunity and civil rights laws.

## **PARTICIPATION IN THE LEARNING COMMUNITY**

Students are required to attend and actively participate in all scheduled class meetings. This includes being on time, being prepared, following through on group projects, and otherwise engaging with colleagues as fellow professionals. Becoming a therapist involves looking closely at ourselves, our values, beliefs, and biases. This can be a very personal, and sometimes

emotional, process. Treating colleagues with respect, listening deeply to their experiences, and being open to diverse world views encourages a collaborative milieu of care in which we can all challenge ourselves and each other to critically examine and develop our skills and perspectives. In order to prepare for each class, students should carefully read and study all assigned materials to be ready to discuss, debate, and apply the content of readings. Class discussion and interaction with colleagues are fundamental to the process of learning to be a therapist and all sessions include necessary information. Therefore, if you must miss a class, fellow students and the instructor may ask you to contribute to learning community in another way. According to the Lewis & Clark Counseling Psychology attendance policy, missing 3 or more hours of a 1 credit course may result in a failing grade. For this course, any absence of more than one hour requires a makeup assignment. If you must be absent or late, please email the instructor at least several hours prior to class.

### **SPECIAL ASSISTANCE**

If you need course adaptations or accommodations because of a disability and/or you have emergency medical information to share please make an appointment with the instructors as soon as possible. It is the responsibility of the student to make his or her disability and needs known in a timely fashion and to provide appropriate documentation and evaluations to support the accommodations the student requests. Requests for accommodations should be routed through the Student Support Services office in Albany 206. Please review the L&C policy at:  
[http://www.lclark.edu/offices/student\\_support\\_services/rights/disability\\_policy/](http://www.lclark.edu/offices/student_support_services/rights/disability_policy/)

### **CPSY DEPARTMENTAL ATTENDANCE POLICY**

Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time may result in failure to complete the class. This would be 4.5 hours of a 45 hour class (3 credits), 3.0 hours for a 30 hour class (2 credits) or 1.5 hours for a 15 hour class (1 credit.) In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness maybe seen as an absence that requires make-up work.

### **EVALUATION & GRADING**

Participation	10 pts
Societal & Relational Assessment & Case Plan	50 pts
Family Assessment Tool Group Presentation	30 pts
Final Case Assessment & Treatment Plan	<u>60 pts</u>
Total	150 pts

$139.5-200 = A$  $135-139 = A-$  $132-134.5 = B+$  $124.5-131.5 = B$  $120-124 = B-$  $117-119.5 = C+$  $109.5-116.5 = C$  $105-109 = C-$

**COURSE SCHEDULE – (10 WEEKS)**

	<b>Topics</b>	<b>Readings due</b>	<b>Assignments due</b>
Week 1 9/12	Relational Assessment & Treatment Planning	R1 Madsen R2 Doherty	Watch “Meet the Patels” in class
Week 2 9/19	Biopsychosocial-Systems Model and Relational Interviewing	Williams chap 1, 2, & 10 R3 Sheinberg & Brewster R4 Andersen	
Week 3 9/26	Social Capital Assessment & Sociocultural Attunement	Williams chap 3 R5 Silverstein et al R6 Pandit et al R7 Garcia & McDowell R8 Unger	Group Presentation
Week 4 10/3	Crisis Intervention & Assessing for Risk to Self-Harm	Williams chap 4 R9 Robert & Ottens R10 Myer et al R11 Myer et al R12 Omer & Dolberger	Group Presentation
Week 5 10/10	DSM-5 in Systems & Relational Context of Psychopathology	Williams chap 5&6 R13 Wamboldt et al R14 Strong R15 Seikkula et al R16 Olson	Group Presentation
Week 6 10/17	Child & Adolescent Behavior Problems	Williams chap 7-8 R17 Tuttle et al. R18 Parra-Cardona et al	<b>Societal &amp; Relational Assessment Due</b> (based on “Meet the Patels”)

Week 7 10/24	Assessing Interpersonal Interactions	Williams Chap 9 Tomm et al chap 1, 5, &6 (Check on Moodle) R19 Gabb & Singh	Group Presentation

Week 9 11/7	Intimate Partner Violence	R23 Bograd & Mederos R24 Todahl et al R25 Whiting et al R26 Stith et al	Group Presentation
Week 10 11/14 <b>Last Class</b>	Substance Abuse Assessment and Treatment	R27 Rentscher et al R28 O'Farrell R29 Rowe	
11/21	<b>Please submit assignment via Moodle</b>		<b>Final Case Assessment &amp; Treatment Plan Due</b>

**MCFT 541: Societal & Relational Assessment and Case Planning Rubric**

<b>CASE PRESENTATION</b>				
	<b>Unacceptable (0-3)</b>	<b>Below Expected (4-7)</b>	<b>Expected/Exemplary (8-10)</b>	<b>Total Points (out of 10 possible)</b>
Assessment considers interconnections among biological, psychological, and social systems as they relate to presenting issues.	Issues and behaviors are described individually without awareness of larger sociocultural context.	Sociocultural context is identified, but individual and family patterns are not well linked to larger contexts	The link between individual and family patterns with larger sociocultural contexts is clearly explained.	
DSM diagnosis is integrated into systemic context.	Diagnosis is incomplete or not systemically integrated	DSM diagnosis is complete but not appropriate or integrated	Diagnosis is complete, appropriate, and systemically integrated	
A systemic case conceptualization and related treatment goals are identified.	Case conceptualization is not clearly defined or focuses on individual problems and concerns and/or clear systemic treatment goals not provided	Case conceptualization includes systems/relational processes but is not clearly articulated and/or related treatment goals are not clearly developed.	Case conceptualization/hypotheses include relationship patterns, their bearing on the presenting problem, and the sociocultural contexts that impact these relationships and these are linked to clear treatment goals.	
Application of research to case planning takes into account the sociopolitical context of research and case.	Research is identified with little or no analysis of the context in which it was produced or how it applies to this case.	Research is summarized and applied with limited awareness of sociopolitical context of the issues and research.	Implications of relevant research are analyzed socio-contextually with rationale for how the literature informs treatment planning in this particular case.	
Case conceptualization and treatment plan are written clearly, concisely, and demonstrate strong analysis of theoretical ideas.	Case conceptualization and treatment plan does not meet the standards of graduate level writing and does not demonstrate strong analysis of theoretical ideas.	Case conceptualization and treatment plan are written clearly and concisely, but analytic thinking is not strongly demonstrated.	Case conceptualization and treatment plan are written clearly and concisely, and strong analytic thinking is demonstrated.	

**MCFT 541: Final Case Assessment and Treatment Plan Rubric**

	<b>Unacceptable (0-3)</b>	<b>Below Expected (4-7)</b>	<b>Expected/Exemplary (8-10)</b>	<b>Total Points (out of 10 possible)</b>
Ability to integrate DSM diagnosis into systemic context	Diagnosis is incomplete or not systemically integrated	DSM diagnosis is complete but not appropriate or integrated	Diagnosis is complete, appropriate, and systemically integrated	
Individual and family patterns are assessed within sociocultural context	Issues and behaviors are described individually without awareness of larger sociocultural context.	Sociocultural context is identified, but individual and family patterns are not well linked to larger contexts	The link between individual and family patterns with larger sociocultural contexts is clearly explained	
Problematic and healing interpersonal interactions are assessed	Assessment focuses on individual behavior and experience only.	Interpersonal interactions are accessed but the focus is almost entirely on problems without identifying potential resources or potential for healing.	Interpersonal interactions that maintain problems as well as those with healing potential are identified.	
A systemic case conceptualization and related treatment goals are identified.	Case conceptualization is not clearly defined or focuses on individual problems and concerns and/or clear systemic treatment goals not provided	Case conceptualization includes systems/relational processes but is not clearly articulated and/or related treatment goals are not clearly developed.	Case conceptualization/hypotheses include relationship patterns, their bearing on the presenting problem, and the sociocultural contexts that impact these relationships and these are linked to clear treatment goals.	
A treatment plan that considers at least 3 therapeutic approaches and includes assessment for safety and addiction.	Treatment plan is not specific to identified treatment goals or only one possible approach is suggested. Assessment of safety and addiction is not evidenced.	Safety and addiction are assessed but treatment plan includes only two possible approaches or is not clearly linked to treatment goals.	Safety and addiction are accessed and a treatment plan with at least 3 different possible approaches is clearly linked to identified treatment goals.	

Treatment plan draws orelevant research	Little or no research is identified.	Research is identified but not well linked to plan.	Plan is clearly linked to identified research.
