Catalog description:

Assessment and Intervention III

This course is the third of a three-part assessment sequence that addresses psycho-educational, social, emotional, and behavioral assessment of children and adolescents from birth through age 21. In this course, the focus is on gaining competency with the skills and tools required to interpret and integrate multiple assessment measures, including reporting and consulting on such assessment data in written and verbal formats.

Required Texts:

Lichtenberger, E. O., Mather, N., Kaufman, N. L., & Kaufman, A. S. (2015) *Essentials of Assessment Report Writing*. Hoboken, N.J.: Wiley & Sons, Inc.

Sattler, J. M., Dumont, R., & Coalson, D. L. (2016) *Assessment of Children: WISC-V and WPPSI-IV*. San Diego: Jerome M. Sattler, Publisher, Inc.

Course Description:

As the third course of a three-part assessment sequence that addresses psychoeducational, academic, social, emotional, and behavioral assessment of children and adolescents from birth to age twenty-one, this course focuses on integrating assessment skills gained in the previous two courses. Students will develop competency in using those skills to collect, synthesize, interpret, and integrate data collected in all of the above areas, and in communicating those results in written and consulting formats. In addition to communicating assessment results,

students will make recommendations to a team of professionals to assist in educational programming for the child who has been evaluated.

The course is designed to continue to prepare students to

1. understand and learn the process of assessment
2. critically evaluate standardized and non-standardized approaches used to measure cognitive, achievement, and social-emotional-behavioral functioning
3. employ an empirically-based method of analyzing and interpreting information obtained during the assessment process
4. link data to interventions
5. communicate assessment findings orally and in writing in a clear and professional manner to a variety of audiences
6. understand the theoretical constructs and psychometric properties that underlie cognitive and achievement assessment tools

This course consists of seminar activities (lecture and discussion), lab meetings and group activities, student presentations, and peer consultation. Students will be spending time outside of class and in practicum engaged in readings, test review, rehearsal, observation, administration, scoring, interpretation of data, and report writing.

SPSY Departmental Attendance Policy:

Class attendance is required. If a special circumstance present a student from attending a class or session, the student must notify the instructor in advance. Students are expected to be to class on time. Students are responsible for obtaining any information in the event of a missed or tardy class. If a student misses more than one class during the semester the student will be at risk of failing the course. Missed classes will require a makeup assignment: a one page bulleted summary of information presented in the class you missed, gathered via interview with your classmates, *and* an article review on a topic related to the missed class with a two-page written review and reflection.

Professional Standards:

Students are expected to know and follow the standards of professional conduct and academic integrity, including adherence to legalities and ethics. Students need to show a respectful demeanor toward students, parents, professional peers, and others. As in SPSY 542, careful consideration must be given to environmental conditions during testing. The confidentiality of all test and assessment results, protocols, conclusions, and recommendations will be strictly maintained in class discussions and peer review. Any identifying information will not appear on any protocols, reports, in class discussions, or peer reviews. All references to students will be by a fake name.

Legal Custodial parental informed consent and permission will be obtained for all minor volunteers at your school site.

Test kits:

For some assignments, you will be sharing test kits with students enrolled in the course under considerable time pressure, so please make sure that you sign out the test kit only for the day (or two) you will be administering it. Test kits will be checked in and out by **completing the School Psychology Test Kit Request form** (<https://goo.gl/forms/wntlCU7EB5O7f6XK2>). Using this form, you will make an appointment to pick up test kits during regular office hours. At your return appointment, the contents of each kit will be inventoried, using the enclosed list of components. **Each member of the group will be financially responsible for all missing components, if any are missing.** An essential aspect of professional courtesy is to return or pass on a kit in perfect condition, ready to be used by the next person.

Disability Services Statement: *If you have a disability that may impact your academic performance, you may request accommodations by submitting documentation to the Student Support Services Office in the Albany Quadrangle (503-768-7192). After you have submitted documentation and filled out paperwork there for the current semester requesting accommodations, staff in that office will notify me of the accommodations for which you are eligible.*

Cell Phones and Laptops:

Please put cell phones away and keep on “do not disturb” mode during class. Please put smart watches on “do not disturb” mode also. Laptops and tablets may be used for note taking during class. It is expected that all students will refrain from checking texts, emails, or social media during class.
