Lewis & Clark College
Professional Mental Health Counseling &
Professional Mental Health Counseling – Specialization in Addictions
MHC 549
Treatment Planning
Syllabus Cover Sheet

Required Objectives:

Professional Counseling Identity (CACREP 2016 Standards)

5a. theories and models of counseling
5h. developmentally relevant counseling treatment or intervention plans
5i. development of measurable outcomes for clients
5n. processes for aiding students in developing a personal model of counseling
8d. development of outcome measures for counseling programs

Entry-Level Specialty: Clinical Mental Health Counseling (CACREP 2016 Standards)

C1b. theories and models related to clinical mental health counseling
C1c. principles, models and documentation formats of biopsychosocial case conceptualization and treatment planning
C2l. legal and ethical considerations specific to clinical mental health counseling
C2d. diagnostic process, including differential diagnosis and the use of current diagnostic classification systems, including the Diagnostic and Statistical Manual of Mental Disorders (DSM) and the International Classification of Diseases (ICD)
C3a. intake interview, mental status evaluation, biopsychosocial history, mental health history, and psychological assessment for treatment planning and caseload management
### Key Required Assignments/Student Learning Outcomes

These assignments are required for the course, but will not be the only requirements/expectations. The chart below lists the assignment, method of submission, and benchmark score/grade. These assignments are set up for upload to Taskstream and/or instructor provides rating for assignment. See syllabus for details.

MHC 549:
TREATMENT PLANNING
FALL 2019

INSTRUCTOR
Justin D. Henderson, Ph.D., N.C.C.
Assistant Professor
Director of Lewis & Clark Community Counseling Center
Office: Lewis & Clark Community Counseling Center
        4445 SW Barbur Blvd., Suite 205
E-mail: justinhenderson@lclark.edu
Office Hours: By appointment

REQUIRED TEXTS

COURSE DESCRIPTION
This course assists students in developing critical thinking, case conceptualization, and treatment planning skills. As a co-requisite to Practicum II, students develop their abilities to gather data, conceptualize from their emerging theoretical perspectives, and plan treatment. Students will learn how to use an ecological, social justice framework to view the client in context, apply evidence based practice with cultural sensitivity, and plan interventions across multiple systems (individual, family, and community).

OBJECTIVES (ALSO REFER TO COVER SHEET)
The student will:

1. Demonstrate ability to gather client data, diagnose, conceptualize and develop treatment plan.
2. Demonstrate the ability to develop measurable outcomes with clients supported by research literature and best practices.
3. Demonstrate ability to provide clear and concise clinical writing.
CPSY Department Attendance Policy

Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time (i.e., 1.5 hours for a 15 hour class; 1 credit) may result in failure to complete the class. In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness may be seen as an absence that requires make-up work.

Workshop Sessions

Workshops are meeting times with a few students (2-4 students) and the instructor to get more in depth questions and feedback pertaining to your treatment plans. Students will sign up for an available time to meet with the instructor. Please come prepared for this meeting (client file, draft(s) of treatment plans) and be ready to work. The use of peer support is also used to help encourage greater reflection and to problem solve challenges in the current treatment plan formulation.

Additional Required and Recommended Readings

Additional articles, chapters, and other materials will be used during the course. These materials will be made available electronically or via hard copy handout(s) throughout the semester.

Required Readings:

**EVALUATION**

**Treatment Plans (150 points each x 2 = 300 points)**

Students will be required to submit complete case conceptualizations and treatment plans for 2 clients seen in Practicum. You will find the format for the treatment plans on Moodle. Case conceptualization & treatment plan write ups will consist of:

- Intake Summary
- Conceptualization
- Treatment Plan

**Due Dates for Case Conceptualization & Treatment Plans**

- Plan I (10/28)
- Plan II (12/2)

**Confidentiality & Ethics**

This course assignment is utilizing client information from your experience as a practicum trainee at the Lewis & Clark Community Counseling Center. For this reason, all case conceptualization/treatment plans will be turned into a designated folder in a counseling center's secure workroom. Additionally, students are required to de-identify client information in the write-up for added protection of confidentiality. All treatment plan work should only be stored on the clinic server or your Ironkey. When printing, you should do so in a secure location, never send a document to a computer lab printer when you are not immediately present to pick it up. No treatment plans should have identifying information on them. Use initials or pseudonyms for client names, and be general when describing details that could identify someone.

**Theoretical Orientation Paper (20 points)**

Counselors ability to formulate coherent treatment plans must also have a coherent theoretical framework from which the treatment plans are formed. In this paper you will extrapolate on what your theoretical orientation as (to date), how you understand how problems emerge in peoples lives, what are the obstacles to change, and what role you play as a counselor in the change process. This paper is to be a brief primer that sets the stage in case conceptualizations done in the treatment plans. **DUE: 10/28** with the first treatment plan.
