

**Initial Programs: Employment Rate
Summer 2020 Completers**

These figures are derived from newly-available public school employment data from the Oregon Department of Education, complemented by completer self-reporting of the following types of educational employment: private school, out-of-state, international, and COVID-related in-home teaching. Because we have fewer than 10 completers in many of our Secondary program subject areas, we have aggregated those data here.

Program	Summer 2020 Completers	Employed in Education	Employed in Education %
Elementary - Multiple Subjects	18	17	94%
Secondary	34	28	82%
