FAMILY THERAPY: THEORY AND PRACTICE
CPSY 504
Summer, 2011

Steve Berman
Office: (503) 238-5899
Email: berman@lclark.edu
Office hours: By appointment

Catalogue Description:
Overview of the fundamental assumptions and ideas of general systems theory and the
basic premises of theoretical orientations within family therapy. Participants explore the
application of course material to their work setting or training track. This course is not
clinical in nature and is not designed to train or prepare participants to conduct family
therapy.
Prerequisite: None.
Credit: 3 semester hours.

Purpose:
It has been said that all therapy is family therapy. Even when working with individuals
we are dealing with the internalized community of others that shaped them and continue
to influence their every thought and feeling. This will be a survey course designed
around the concept of family as a system that powerfully influences, and is influenced by,
the behavior of individuals within that system. The fundamental concepts of general
systems theory will be applied to the interactional patterns within families and the major
theories of family therapy will be explored. Selected topics, controversies, themes, and
trends in the field of family therapy will be discussed.

Because each student in this class is also a member of a family that has shaped his or her
assumptions about reality and relationships, as well as career choices, it is essential that
the student recognize and understand the ongoing influence of family of origin on his or
her thoughts, feelings and behavior. Therefore students will be required to examine their
own experiences in their family of origin and their taken-for-granted assumptions about
family as an essential prerequisite to being able to understand, and intervene in, the
systemic interactions of other families.

The course will be a combination of theoretical and clinical material. This course is an
introduction and is not designed to prepare the student to do family therapy. The hope is
that students will be excited enough by the powerful possibilities of family therapy that
they will pursue further training and coursework in the field.

The purpose of this class will be best accomplished within a classroom milieu that
encourages critical thinking and discussion, open debate, experiential learning, and fun.
**Course Objectives:**

1. Learn the history of marital, couple, and family therapy; the primary professional state, national, and international associations; and the core competencies (as defined by AAMFT) required to practice family therapy (CACREP: II.K.1.a) (NASP 2.8) (COAMFTE PM, KS 02).

2. Understand principles of theory construction and model building and how these influence the extent to which theories and models developed within particular cultural contexts are applicable for clients from contrasting cultural contexts. (NASP 2.8) (COAMFTE: PM)

3. Consider the dynamics of power and social location relative to developing, researching, and applying field knowledge and theory, with attention to how family therapy has the potential to contribute to social inequities and social control. Recognize issues of power and privilege relative to own and clients’ social locations and how these influence therapy, problems and solving problems (CACREP II.K.2.a, II.K.2.c) (NASP 2.5) (COAMFTE PM).

4. Understand concepts and theories that are foundational to the practice of marriage, couple, and family therapy, as well as trends in the field. These include: first and second order cybernetics; patterns of interaction; Bowen’s core systems concepts; Minuchin’s structural approach; MRI problem formation/principles of brief therapy; feminist critique of general systems theory; social constructionist/post modern paradigm; and critical theory and family therapy (CACREP II.K.5.c, II.K.5.d) (COAMFTE CC 1.1.1, KS 01,05,06).

5. Develop a beginning knowledge of marital, couple, and family life cycle dynamics, healthy family functioning, family structures and development in a multicultural society and world, with particular attention to how systems of power and privilege influence family life (CACREP II.K.2.c) (NASP 2.8) (COAMFTE CC 2.1.1, KS 11).

6. Learn and practice several methods (e.g., sculpting, genograms, structural maps) for assessing family dynamics, family of origin/intergenerational influences, history, and cultural heritage to identify patterns, understand belief systems, and identify strengths/resilience (NASP 2.4) (COAMFTE CC 2.3.8, TS 2.01, 2.03, 2.06, 2.12, 3.12)

7. Gain an understanding of couple and family healthy functioning and life cycle development across cultural contexts, life worlds, and family forms. And apply principles of family and couple life cycle development from culturally and contextually situated perspectives (CACREP: II.K.2.e, II.K.3.a) (NASP 2.4, 2.5) (COAMFTE CC 2.1.1, KS 11).

8. Practice skills in conceptualizing problems systemically, developing therapeutic alliance with multiple members of a system, and interviewing from a relational perspective (e.g., using relational questions, identifying verbal and nonverbal relational patterns, enacting communication between systems members). (CACREP C7) (NASP 2.2) (COAMFTE CC 1.3.6, 4.3.5, TS 1.01).

9a. Explore, compare, and contrast in depth the theory and interventions associated with at least two major models of family therapy (CACREP C7).

Or if you are in School Psychology

9b. Compare and contrast two models of family therapy and how those theories could be used within school systems and increase home-school collaboration.
**Related Authorizations:**

Successful completion of this course is necessary for fulfillment of degree requirements for any of the specialty areas in the Counseling Psychology Department. This course is also necessary for gaining access to licensure as a professional counselor, school psychologist, or marriage and family therapist.

**Instructional Methods:**

The class will combine didactic and experiential methods. Class periods will include discussion of the readings, lecture, role plays, demonstrations, video, experiential exercises and debates.

**Required Texts:**

Additional readings will be available on Moodle.

**Course Requirements:**

1. Active engagement in class through asking questions and participation in discussions, role plays, and exercises.
2. **Attendance is mandatory.** One excused absence will be allowed without penalty. Each absence beyond one will result in a reduction in the final grade by a half letter. Late arrival is disruptive and should be avoided unless cleared in advance with the instructor. Showing up fifteen minutes or more after the start of class will count as an absence.
3. Completion of all assigned readings. Readings will be discussed in class and your comments and questions should reflect a thoughtful consideration of the material.
4. Family of Origin Project (see below).
5. Group Project (see below).

**Evaluation:**

Grades will be assigned based on points earned as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class Participation</td>
<td>25</td>
</tr>
<tr>
<td>Family of Origin Project</td>
<td>100</td>
</tr>
<tr>
<td>Group Project</td>
<td>75</td>
</tr>
<tr>
<td>Total Possible Points</td>
<td>200</td>
</tr>
</tbody>
</table>

Grading scale: 185-200 = A  
180-184 = A-
175-179 = B+
170-174 = B
165-169 = B-

**Class Schedule:**

**May 9:**
Introduction to class.
Group assignments.
Course overview.
Introduction to systems.

**May 16:**
Nichols, Introduction and Chapter 1
McGodrick & Gerson, Chapter 1, *Why genograms?*
Chapter 2, *Constructing genograms*

**May 23:**
Nichols, Chapter 2
Chabon, *William and I*

**Part One of Group Project Due**

**May 30:** *Memorial Day – No Class*
Nichols, Chapter 3

**June 6:**
Nichols, Chapters 4 and 11
Johnson, *Emotionally focused family therapy*
Levy & Orlans, *Creating and repairing attachments in biological, foster and adoptive families.*

**June 13:**
Nichols, Chapter 5 and 9
Kerr, *Theoretical base for differentiation of self in one’s family of origin.*

**Group One Presents**

**June 20:**
Nichols, Chapter 6
Prevatt, *Milan Systemic Therapy*

**Group Two Presents**

**June 27:**
Nichols, Chapter 7
Kemenoff, Jachimczyk, & Fussner, *Structural Family Therapy*

**Group Three Presents**
July 4: NO CLASS

July 11:
Nichols, Chapters 12 and 13
White, *The externalizing of the problem and the re-authoring of lives and relationships*

**Group Four Presents**

July 18:
Nichols, Chapter 8
Lawrence, *The humanistic approach of Virginia Satir.*
Treadway, *The ties that bind*

**Group Five Presents**

July 25:
Nichols, Chapter 14 and 15
Philpot and Brooks, *Intergender communication and gender-sensitive family therapy.*

**Family of Origin Project Due**

August 1:
Nichols, Chapter 16

**Final exam**

---

**Family of Origin Project**

**General instructions:** This assignment requires you to apply the concept and theories we will study to your family of origin. In order to complete this assignment you will need to conduct at least two interviews of family members. You may interview parents, grandparents, siblings, aunts, uncles, or cousins. You will cite these interviews in your bibliography. Please discuss confidentiality with your interviewees, get permission to use the interview material, and offer to change names if they so desire. You may include pieces of transcript in your paper only with expressed permission of your interviewee.

**Instructions for paper:**

**Section one: (One page)** Produce a detailed genogram of your family of origin covering at least three generations (going back to your grandparents). The genogram may be hand drawn but I prefer that you use a genogram software program. Go to [www.genopro.com](http://www.genopro.com). Click on the academic link and, when prompted enter my academic key, *sberman*, and you will be have free access to the genopro software program for 180 days.

**Section two: (4-6 pages)** In narrative form, write a systemic analysis of your family of origin, referring back to the genogram. Issues you should cover include boundaries.
(within the family as well as between the family and the world), hierarchies, subsystems, alliances, rules (spoken and unspoken), feedback loops, adaptability, cohesion, power, attachment styles, cutoffs, family myths, significant losses, communication style and patterns, triangles, homeostatic regulation, inclusion and intimacy. You must give specific behavioral examples to back up your analysis. Don’t just say, for example, that there were strong intergenerational boundaries, discuss the specific behaviors that demonstrated that those boundaries existed.

Section three: (6-8 pages) Select a theme of your choice to research and apply to your family of origin. You may create your own theme or select from the following list:

1. The effects of alcoholism or addiction on the family.
2. Gay and lesbian families.
5. The effects of violence or abuse.
6. Family secrets.
7. Legacies of loss.
8. The role of ritual in the family.
10. Cultural themes.
11. The effects of mental or physical illness on the family.
12. Gender roles within the family.
13. Family stories and the construction of meaning.
15. Enmeshment and disengagement.
16. Emotional milieu within the family.

In completing this section you will need to cite at least three scholarly articles and/or books that address the theme you are discussing. You will also need to give specific behavioral examples to illustrate your theme as it plays out in your family of origin.

Section four: (One page) Attach a bibliography citing all references using APA reference style. List all interviews, including person interviewed, date of interview, length of interview and mode of interview (phone, in person, email).

This paper is due July 25. Papers may be handed in before that date but no late papers will be accepted. Paper must be double-spaced, using 12 point font.

Grading:

Writing conventions (spelling, grammar, organization) 5 points
Genogram (completeness, neatness, clarity) 15 points
Systemic analysis (completeness, depth, grasp of concepts) 30 points
Selected theme (depth, originality, insight, quality analysis) 45 points
Bibliography (APA style, documented interviews) 5 points

Total possible 100 points
Extra Credit: Up to four students may volunteer to present their Family of Origin Projects in class. Students who do this will receive 10 points of extra credit on this assignment.

It is understood that this assignment can be emotionally difficult for some students in that it might require focus on issues they are not prepared to address, or they may feel uncomfortable in exposing personal information to the instructor. If you feel you cannot complete this assignment please make an appointment to talk with the instructor and an alternative assignment will be arranged.

Group Project
During one of the first class periods you will be assigned to “families”. These families will remain together throughout the term and will be the subjects of the role plays we will do in class. In addition, your “family” will be your workgroup for the completion of this assignment. Your “family” will be randomly assigned an “issue” that brings you to therapy and will also be randomly assigned a theory from which to approach this issue. Some time in class will be allocated to work on your projects but you will need to do considerable work and communication outside of class in order to complete this assignment.

Part one: Meet as a group. Assign roles, deciding who will be the parents, the children, etc. Decide on the age and gender of the children. Who is the identified patient? Describe the relationships between family members. Develop an identity and history for each family member. Decide how the identified problem will play out in the family. Keep notes of your decisions. On May 23 you will turn in a brief, 3-4 page paper describing your family, the individuals, the history of the problem, and a genogram. Only one paper is expected from each group.

Part two: In addition to a family “issue” you will be assigned a particular theory. You will need to research how your assigned issue would be addressed within this theory. For example if your issue is “alcoholism within the family” and your assigned theory was “solution-focused” you would need to research how a solution-focused family therapist would address alcoholism in the family. Your group will then do a demonstration of this approach to this problem by role-playing a family session for the class. This presentation should be no more than 30 minutes. For purposes of this demonstration, one of your group members will need to step out of his or her usual family role in order to be “the therapist”. As part of the presentation, your group will do a brief (30 minute maximum) didactic presentation on your theory which addresses the techniques that were demonstrated and the theoretical constructs involved. Be prepared to answer questions. Dates for these presentations will coincide with the schedule of readings on each theory. You will need to hand in a bibliography citing your sources.

Grading:
Part one (Family Description) 15 points
Part two (Demonstration/presentation) 60 points
Total possible 75 points
